Hi Karen,

Tobias has basically finished all his work regarding the Pension Salience paper.

Regarding the next steps, I would say there are the following two:

- There is a comment on p. 13 of the memo (highlighted in yellow) which is not sufficiently addressed. The manuscript hasn't changed in reaction to that. I believe you were in charge of that one. Could you check it out and make the necessary changes in the text? You don't have to send it to us after doing this.

- The next step is trimming down the text. Using the word count rules of JEPP, the text now has 11,124 words. Their maximum is 10,000, but in my experience journals usually accept 500 extra words. So we need to eliminate about 600 words. Could you do it? Maybe there are unnecessary sentences or references in the text.

Best,

Juan

Thanks, Tobias!

Juan--what is the next step? I assume you need to process the documents and then give the paper to me for editing, right? best, Karen

Hi Tobias and Karen,

Thank you, Karen, for your edits. I accepted all of them.

- Between yesterday and today I reread the main file, the memo and the appendix. I made a few but very tiny edits in the files to clarify matters and avoid a couple mishaps.

- I reran the models and checked again the main coefficients. All looks good on that front.

There are still 4-5 points where we could make improvements. Tobias, could you check those and make changes if you consider it convenient? I flag those points with side bubbles.

Best,

Juan
